

To Whom it may concern:

We are applying under 8.10-4C to place a Solar Array in from of a main dwelling at:

208 Edgartown West Tisbury Rd
West Tisbury, MA 02575

We are also applying for a 5ft setback relief for an accessory structure on the property.

After receiving approved Building and Electrical permits for a ground mounted solar array we completed the installation of the project at the Scott home. At the point of requesting final inspections it was found that we needed to begin the Zoning process as detailed above. The Scott's and the Town of West Tisbury have been very patient and understanding and we hope to complete the project as soon as possible.

Thank you

Justin Krogue
