

Nickolas Peters Construction LLC / dba Acme Excavation

I have grown up and lived at 343 State road since 1988, with my family. We have farmed the landscaped at 343 state road my whole life. We have run an Excavation and Landscape company at 343 State road since 1988. We do not have a office where customers visit, and do not have any other traffic in and out of this property other than our own trucks that are associated with our business. I've included a site map showing where our trucks and equipment are parked. As of right now I have one employee who is my cousin and is here on the property everyday. My brother works with me also as a sub contractor/ partner and frequently comes to visit my mother who lives in the front of the property and works with use. We work regular 8-5 hours Mon.-Sat., where we come load trucks and leave and then return and park trucks. We are normally only on the property 30minutes in the AM and 30 minutes in the PM. Our neighbors also run Landscape and Farm businesses.
