

To the town administrator and select board

I do not believe the town should mandate vaccines to employees, it should remain the employees choice and be a private matter. Town employees have done an excellent job during this pandemic. Fear and rhetoric should not eclipse the fact that there have been no deaths and very few hospitalizations on the island in the past 16 months. Town workers have proven success, whether they were vaccinated or not. There is no need to mandate vaccinations to those who choose not to get one, it could expose the town to law suits for little to no statistical gain.
