**Subject:** RE: FW: Tree pruning inquiry

715 Old County Road

I have viewed the trees over the road at this address, they're not oak trees? They are not in the road layout. It is my opinion they should not be pruned, every tree on old county road is near wires and could be hazardous. I would suggest a public hearing to decide this and I will be available.

Jane,

Jen referred you to me about the process of pruning one of our trees that extends over Old County. We may be considering pruning an oak that is located on our property 715 Old County) Along the edge of the road. The tree is flourishing and has extended over the road. It could in a great future storm affect our wire connections and possibly others. Should we decide to prune the extending branches in the future, what would the WT process be?

Many thanks.  
Beatrice
