

Good morning Jane. This is the proposed retaining wall mostly 4 feet exposed on the backside of the garage. That is the additional that we are looking for. The grade drops off very quickly and we would like to make sure the soil does not move over time.

That understood the additional retaining wall we are requesting will be left natural concrete facing into the woods somewhere around 300 to 400 feet away from the road.

It should not be a visible event for any neighbors.

Regards

Kevin j
