

March 9, 2023

Dear Select Board,

At our March 8<sup>th</sup> meeting of the Energy Committee, we discussed ways that we might be better connected to the current and future work on buildings in the Town.

We would like to request that Richard Andre be appointed as the at-large representative on the Capital Improvements Committee so that he can provide information as needed with regard to our buildings and town resilience.

We would like to request that Kate Warner be appointed to be on the Facilities Committee so that she can provide information as needed about energy efficiency in keeping with our town being a part of the State's Green Communities program.

We hope that these requests meet with your approval.

Sincerely,

Kate Warner, Chair  
Energy Committee
