Subject: Possible Bylaw reorganization for discussion
Attachments: Building Bylaw Suggestion.pdf

Hi All—

I have attached a document that suggests a new way of organizing our buildings bylaws. If anyone is interested, I would ask Jan

My idea here is that one goes to the “buildings” section, picks habitable, non-habitable or combo, then chooses the building type in town, size information, setback information, coastal restrictions, special permit conditions, etc.

This is an early thought; I haven't really carried it out. The information could be listed right under the building title, or there could

Just a thought ...
