West Tisbury, Ma 02575

Dear Maria and members,

In 1983, I believe it was spring we had the West Tisbury Conservation Commission visit property owned by the Cottle's off of Lambert's Cove Rd. The purpose of the visit was an inspection of property to see if there were wetlands and if the property could be built on.

Six or seven members came. We walked the entire property which took time looking for evidence for a determination.

When they were finished they told me that there were no wetlands and that the lot was a buildable lot. Go ahead get your permits and good luck.

We then received approval of the subdivision, the deed, and building permits.

We started building in 1984.

Sincerely yours,

Glenn E Johnson
