Richard T. Olsen  
Highway Superintendent

## Lambert's Cove bridge railing repair.

Jackie Hempsted, my thought is core down into the concrete wall ten to twelve inches deep, large enough to accept a two inch outside diameter extra heavy steel pipe with two-part epoxy, there are five on each side, ten feet apart. I will send you pictures of the existing posts, and you will see there is some fabrication and welding. I would ask you to supply the pipe and fabricating. As per our conversation we will supply the wood and bolts and do the painting.

Sincerely,  
Richard T. Olsen
