

Town Managers and Administrators, please share with your Select Boards.

After the last meeting of the MV towns with Nantucket, I had a thought and a proposal that might assist in the meetings being more productive.

I would suggest for your consideration for some tweaks to add clarity and order to the meetings and process.

Each SB agree on an item to put on the agenda. The Chair of the SB and the Town Manager attend the meeting as participants.

The Chair rotates at each meeting, so that one individual is charged with running and chairing the meeting. The object is to keep discussion productive and on track.

Assuming there may be 7 agenda items unless some are similar, the object of the meeting would be to define common issues and explore suggested alternative solutions to these issues so that measurable "action items" could be developed and worked upon.

Results and progress to be shared at the following inter island meeting.

We had thought that the next meeting might be in October so please give this idea some consideration and let the group know if there's interest in proceeding in this manner.

Best -
