Both the of the owners, West Tisbury residents for nearly 50 years, are in their mid- seventies and have experienced significant medical and mobility issues. The home has no bedroom on the first floor and the area does not lend itself to conversion. The proposal to create a handicapped accessible, first floor bedroom will allow them to "age in place". The home is not visible from the public road or from Vineyard Sound, there are no abutters that would be effected and the current septic is properly sized to accommodate the additional bedroom.
