

Email:

As you know, the trail head parking at the end of Indian Hill Rd. is often full on weekends and the over flow parking on the road has been objected to by abutters and large vehicle drivers making the loop.

We propose to expand the existing 4 car lot to 8 cars in the layout shown below. We chose a "T" shape rather than a long single row to reduce the overall area to be altered. With this shape, each side can share the back out space with the other.

This will require only 2 red oaks to be cut, one is already in poor shape. The entrance gate, curb cut and approach will remain as is.

Please let us know if a hearing, or more a detailed plan is required.

We will do this work this spring if there are no objections.

Thanks,

Peter
