OLD/NEW BUSINESS: The Board was provided with an update on the Marijuana for Local Boards of Health Luncheon. Health Agent Johnson noted that the meeting was a review of current regulations. The moderators of the luncheon were not able to answer a multitude of questions due to not having the answers themselves due to the complexity of the regulation.. The Board was informed that efforts were still being made to procure a contractor to clean up the swale surrounding the solar arrays. The Board members are not content with simply removing the weeds and are looking for a more thorough solution in order to make the best use of the funds being allotted for the project. Discussed were the following: Obtaining additional bids outside of the one already received, determining whether animals, determining whether goats would be able to remove the vegetation in a more thorough and complete manner and if it was possible to set a “test section” for this idea. It was also discussed whether rocks would need to be removed, which require additional labor and lastly, what methods of clean-up are used by landfills off island, and lastly whether the State could recommend a clean-up/removal method that would be more effective in removing the vegetation (mugwort) whose roots must be removed to completely eliminate regrowth

PERMITS APPROVED:
