

Mill Brook Watershed Management Committee
Minutes for November 16, 2020 meeting at 5 pm

People present: Selena Roman, David Bouck, Donna Paulnock, Bill Willcox, Kristen Geagan, Prudy Burt, Angela Luckey

Absent: Cynthia Mitchell, Tim Boland

Approved November 9, 2020 Minutes

CPA presentation PowerPoint slides shared and reviewed slide by slide.

- Having Mass DER review our plan for suggestions and input

Acknowledged that legal bill of \$428.75 is included in our budget.

Discussed Neal Price's estimate of \$150 per nutrient sample, so we believe our budget for sampling should be sufficient.

- May add other parameters like metals during storm event sampling.

Loggers for continued dissolved oxygen are expensive, so need to explore that further to refine where and how many we could get.

Listed off and confirmed sampling sites:

Nutrient sampling sites (5 and blind)

- Remained the same but pushed site 1 up to Roth Woodlands and did remove the Crocker site since we presume we will not have access to the site
- Making the crocker site our blind duplicate sample

Flow sites (7)

- Roth Woodlands
- Indian Hill
- State Road
- Scotchman's (2) – one above and one below Whiting diversion dam
- Mill Pond
- Factory Brook

May need to share with Heidi ahead of time so she can share it

- Wednesday, 18th at 5 pm
- Confirmed that Selena, David, and Angela will be attending meeting and sharing presentation.

Next meeting scheduled December 7, 2020.

approved by the committee on 12/14/2020
